

# CAM-FIT™ RETENTION SYSTEM

A GAME-CHANGER IN STABILITY, ADJUSTABILITY AND FIT

Advanced Combat Helmet (ACH) fitted with Black retention system

## TEAM WENDY'S NEWEST RETENTION SYSTEM

is the first stand-alone chinstrap to feature dial-adjustable fit. The Boa® Closure System provides the ultimate in stability, adjustment and fit while remaining lightweight and durable. Taking it one step further, the retention system is compatible with a wide variety of helmet liner systems as well as most common ballistic shell styles.

The Boa® System's unrivaled technology ensures the most secure fit in a matter of seconds. The addition of cam-lock sliders furthers the ease of one-handed adjustment — set them in place once and let the Boa® System do the rest. The cam-locks also result in no loose ends or hanging straps.

The System responds to the dynamic loading conditions of a modern combat helmet. It is capable of withstanding the additional weight of headborne accessories while maintaining balance and stability.

**THE FIRST  
STAND-ALONE  
chinstrap to feature a  
dial-adjustable  
fit system**
